Turkishceramics is representing all ceramic manufacturers and exporters in Turkey and it is the only association in this field. Representing over 30 individual companies, the Group’s mission is to raise awareness of Turkish ceramics abroad and promote the quality of Turkish ceramic tiles and sanitary ware.

Ceramic production in Turkey has a long history and rich tradition with the first ceramics to be created in Anatolia over 8000 years ago. Ceramics are the acknowledged and important component of Turkey’s culture. Turkish ceramic producers are proud to continue this tradition of innovation today with a creative approach and a broad range of products for both the professional and consumer markets.

The Anatolian Region is rich in natural resources and enables Turkey to produce some of the most important materials necessary in the ceramics production process. The use of superior materials results in high quality, durable products.

Turkish ceramics are continually being chosen to be used in the most progressive new buildings and the finest renovation projects. Collaborations with leading international designers have resulted in Turkish manufacturers producing some of the most innovative and forward thinking ceramics products of recent years. This creative approach has resulted in numerous design awards and accolades.

The popularity of Turkish ceramics continues to grow worldwide. Today, Turkey is the world’s 6th biggest exporter in ceramic tiles and sanitary ware. Turkish ceramics are exported to 180 countries, spanning every corner of the modern world.

Our mission is to offer state-of-the-art products that add to creating a better-built future. Our products are produced using the most technologically-advanced machinery and processes, positioning our tradition of ceramic manufacturing onto the future’s centre stage.
